

Innovative technology to detect and monitor hot objects

INFRARED TEMPERATURE SENSOR WITH IO-LINK

Balluff's Infrared Temperature Sensor allows monitoring high temperatures without contact in inaccessible or harsh environments. Temperatures of hot objects that are moving can be reliably monitored.

Housed in a rugged M30 stainless steel housing with IP67 protection this sensor features a multi-function display with auto-rotation. The IO-Link interface enables such features as parameterizing of the sensor remotely, e.g. by the host controller or from the control panel.

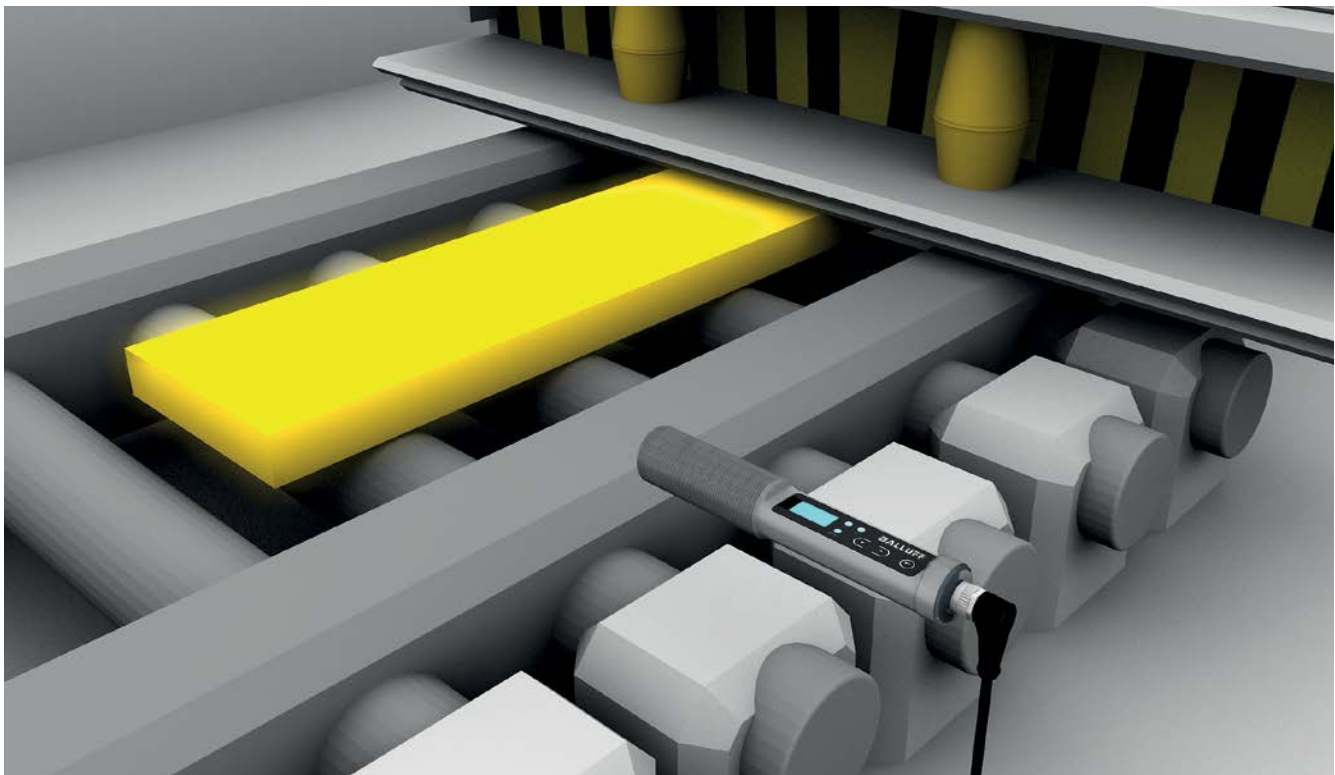

Enhanced functionality and IO-Link connectivity allows this sensor to solve a wide range of applications. These include foundries, forging, steel plants, the ceramics industry or glassworks.

Features

- Temperature range
250...1250 °C (482...2282 °F)
- Non-contact
- IO-Link interface provides numerous functions including remote parameterization
- Also available with 4...20 mA interface
- Reliably detects even moving objects

 **IO-Link**

TEMPERATURE SENSORS
